WHAT WILL YOUR NEXT
MASON JAR ADVENTURE BE?

We know installing your Jarware can be a little tough sometimes, but don't fret!

The plastic used for our Jarware items and the size of the rim can vary ever so slightly during production. These small variations can sometimes compound and make certain items easier to snap in, or vice versa harder to snap in.

If you are having difficulty, please run the band over hot water for 30-60 seconds and then try to snap in the Jarware.

Jarware liquid items (Cocktail Shaker, Tea Infuser) need to have a tight fit and will require some extra force. As such, the product was never intended to be removed from the rim and should be considered permanent.
