Truly jewelry for the table, Michelangelo is luxury in its most celebrated form. This heavy pierced, baroque pattern is an expression of design that's opulent and artful. The tactile, heavyweight pieces are polished and balanced in the hand, with the ornamental structure yearning to be held. Since its introduction in 1965, it has set the standard of excellence in decorative design, and has been one of the bestselling patterns ever created.

Fill with fresh cut fruit and water and place in freezer. Natural fruit infusion takes time, so while freezing, the water-to-ice becomes naturally infused by the fruit. This infusion process is enhanced by the expanding water-to-ice applying gentle pressure on the fruit to release its deep flavour. Once frozen, the resulting icicle has already been highly pre-infused.

RICH FLAVOUR RIGHT AWAY ...AND ICE COLD

Drop the icicle into your hydration bottle (needs 2" opening) or tall glass and fill. The icicle immediately starts to release its infused flavour so you will quickly have a delicious natural fruit infused cold beverage.

In 1882, an Indianapolis chemist noticed how clean and shiny his tarnished pot was after cooking rhubarb. Using an active ingredient that's found in the plant he formulated a talcum-smooth cleanser and sold it to the city's taverns. So pleased were his customers with how well it worked on bar fixtures, the product was dubbed the "Bar Keepers Friend."

The same non-bleach formula that put a shine to the brass rails of taverns at the turn of the century is used in households today on stainless steel, porcelain and ceramic surfaces among many others.

Today, Bar Keepers Friend is still made in Indianapolis and contains no phosphates.

Use Bar Keepers Friend® in the Kitchen:

- Sinks — clean sinks made of porcelain, stainless steel or solid surfaces. Other cleansers containing bleach are not recommended for stainless steel. BKF® is also recommended for sinks in bronze, brass and copper.
- Faucets — clean faucets in chrome, brass and other finishes.
- Countertops — clean countertops made of laminate, composite and solid surfaces.
- Cooktops — clean and remove discoloration on glass and ceramic cooktops.
- Cookware — clean and shine pots and pans made of stainless steel and copper.
- Tile & Grout — clean porcelain and ceramic tile. Bar Keepers Friend® also cleans light coloured grout.
- Coffee Makers - clean coffee residues for better tasting coffee (cleaner); remove the scale so that coffee brews better (descaler).

Our unique design keeps butter at the perfect “spreading” consistency by reflecting outside heat while insulating and cooling the butter. Flavour and freshness is protected by an airtight seal of water at the base of the crock for up to 30 days.

Proper maintenance: water should be changed out every three days. Replace existing water in the base with fresh, cold water. The crock should be stored away from heat or sunlight.

Holds up to one full stick (1/2 cup) of butter. Softened butter is packed firmly into the bell-shaped lid. Cold water is poured into the base of the crock. The lid is placed upside down back into the base of the crock. Soft, spreadable butter may be enjoyed and served right from the crock.

All crocks are made of highly durable New Bone China and are dishwasher safe.
