From New Zealand rugby to baby bibs! Lance's knowledge of product design and manufacturing began years ago while working in London for a well-known gift/novelty company. After launching their U.S. operations while living in New York, the native Kiwi moved to Colorado, along with his wife. Fatherhood soon followed, and with the birth of his two beautiful daughters, his conversations changed from rugby to bibs and all things baby.

STERILITE® Pitchers

The Twist & Pour Pitcher features an easy-twist lid that contains an open hole and a strainer option for pouring. Sterilite also offers Pitchers with either an innovative pivot-top spout that opens with a touch of a finger or a hinged flip-top spout that stays open and out of the way when pouring. Comfort-grip handles on all pitchers aid in pouring, while graduated measuring marks make it easy to mix drinks inside the pitcher.

COOKINA®

Now you can cook like a chef! COOKINA® makes sure you don't need to worry about anything else apart from flipping the food at the appropriate moment thanks to a revolutionary material. COOKINA® looks like a sheet of plastic, except that it is heat-resistant and it won't burn. It retains the heat just like a BBQ plate. Its non-stick quality allows you to cook your food to perfection without using oils or sprays to grease the surface.

Once you have finished cooking you only need to wash it in warm soapy water. It's ready to be used again. You can cook healthily and clean up in a minute or less. COOKINA® is reusable and holds no odor or flavour from previous use, so you can cook fish, wipe your COOKINA®, and then cook pancakes in the same spot.

Zesters, Graters, & Slicers

Using the KitchenIQ™ Better Zester is just fun! Never before has zesting been so effortless. The combination of the V-etched teeth and non stick coating allow this Better Zester to skim across the surface of rough citrus while producing thin wisps of flavorful zest without grating into the bitter pith. The frame of this unique Zester is formed with a slight curve allowing a smoother, more steady stroke when zesting. (Or what some call violining! Now just call it better zesting!) KitchenIQ™ has added additional features like the fresh zest storage container with a fantastic squeegee attached for easy zest removal from the blade.

The KitchenIQ™ Better Zester is simply a better way to zest!

- Over 300 V-etched teeth use the shear action of their unique V-shapes to produce even, uniform cuts while using minimal force
- A Non-stick coating allows foods to glide across the blade smoothly and makes clean up fast and easy.
- The Fresh Zest container includes measurements and holds the freshly grated zest, allowing cooks to place the zest directly into their dishes (no need to dirty a measuring spoon).
- The "one of a kind" squeegee slides across the back of the blade removing the flavor rich moist zest from the back side of the blade
- Designed in the USA by Smiths®, The Edge Experts®, a leader in producing sharp edges since 1886.
- Patent pending Stainless Steel V-etched Zester Blade for zesting all types of citrus
- Patent pending non-stick food approved coating for smoother zesting and easy clean up
- Fresh zest storage container with measurements
- Squeegee for easy zest removal
- Non slip tip
- Ergonomic soft touch handle
- Reusable cover
- Dishwasher Safe

Smoothly and effortlessly zests without grating into the bitter pith.

Includes Fresh Zest storage container with measurements.

No more dirty fingers! This little device slides across the back of the blade removing the wet, moist zest.

V-shaped teeth easily glide across the surface of the fruit using their shear action.

Anchor Hocking is proud to be a leading glass manufacturer in America. We strive to maintain high standards to provide the finest quality products in the marketplace today. Our “Made in the U.S.A.” logo is featured on our packaging to bring awareness to the consumer of the products manufactured in the U.S.

Anchor Hocking has been in the business of manufacturing glassware products for more than 100 years. As befits a company with our heritage, we have continued to produce quality glassware throughout the decades. We manufacture a majority of our products in Lancaster, Ohio. We are as emphatic about the quality of our products today—proud of the design and of the value they represent for consumers and the fact that you will find them in the kitchens, bathrooms and living rooms of most every home. But there is one way in which we have changed in recent years, and that is the corporate-wide commitment we have made to become a more environmentally friendly company. It is an intitiative we view as being vital to our future, and we’re taking many positive steps to make it happen.

Anchor’s Glass is 100% recyclable once a product has met its life’s end. This helps reduce trash in landfills, cuts down on pollution and saves raw materials. Anchor reclaims all of our waste glass known as cullet. We then reuse the cullet in our furnaces to help create new glass. That means using fewer raw materials, saving energy, cutting down landfill waste and less pollution. Anchor has instituted a Corporate Responsibility for Sustainability program that identifies opportunities for waste reduction including raw materials, energy and pollutants on an ongoing basis. We design our packaging to reduce environmental footprints. Anchor utilizes recycled and recyclable materials as often as possible along with reducing the overall packaging material requirements and size. This reduces the need for new raw materials and allows us to ship more products using less transportation and fuel. Anchor’s glassware does not contain lead or any other materials that are harmful to your health. In addition, plastic lids used on Achor food products are BPA free.

In 1882, an Indianapolis chemist noticed how clean and shiny his tarnished pot was after cooking rhubarb. Using an active ingredient that's found in the plant he formulated a talcum-smooth cleanser and sold it to the city's taverns. So pleased were his customers with how well it worked on bar fixtures, the product was dubbed the "Bar Keepers Friend."

The same non-bleach formula that put a shine to the brass rails of taverns at the turn of the century is used in households today on stainless steel, porcelain and ceramic surfaces among many others.

Today, Bar Keepers Friend is still made in Indianapolis and contains no phosphates.

Island Bamboo™

Island Bamboo™ products are an earth friendly choice for kitchenware products because they are high quality with a long useful life, manufactured from bamboo, a renewable resource and thoughtfully packaged to reduce waste.

The Island Bamboo™ brand is manufactured exclusively from Moso bamboo, while the HUE Bamboo line extension incorporates innovative material accents including non-toxic silicone, food safe lacquer and rainbow wood made from white birch.

Bamboo is a renewable resource and viable alternative to wood and petroleum based products. It is a plant that grows abundantly, as much as 2 feet per day, with little water while providing 35% more oxygen than similar standings of timber.

Additionally, Island Bamboo™ uses Moso bamboo, which is not a food source for China's endangered Giant Panda.

The Original FRESH & CREAMY Butter Bell®

Our unique design keeps butter at the perfect “spreading” consistency by reflecting outside heat while insulating and cooling the butter. Flavour and freshness is protected by an airtight seal of water at the base of the crock.

Proper maintenance: water should be changed out every three days. Replace existing water in the base with fresh, cold water. The crock should be stored away from heat or sunlight.

Holds up to one full stick (1/2 cup) of butter. Softened butter is packed firmly into the bell-shaped lid. Cold water is poured into the base of the crock. The lid is placed upside down back into the base of the crock. Soft, spreadable butter may be enjoyed and served right from the crock.

Classic Crocks

The Original Butter Bell® Crock is a modern version of the Authentic French Beurrier. Each piece is individually hand painted for a one of a kind uniqueness. Two styles have the French word for butter “Beurre” on one side and the English word "Butter" on the other. Made of high quality New Bone China crocks are dishwasher safe and lead free.

My Knife Is Smarter Than Yours®

Like most unique companies, Ergo Chef was founded serendipitously. Scott Staib wasn't supposed to make knives; he was supposed to be a chef. After his training at Johnson & Wales University, Scott set out to rise through the culinary ranks. His first stop was an ultra-swanky country club where he proved his mettle as the sauté and grill chef. Next was his gig as sous chef for Aramark Food Service Corporation. He was on the fast track in foodservice when he was sidelined by tendonitis and carpal tunnel syndrome—a result of the repetitive motion injuries caused by frequent chopping and slicing. Without a fully-functioning wrist, Staib could not cook his dinner, let alone advance his career.

He was not alone. Scott found that he was not the only chef—professional or home—to suffer from tendonitis and carpal tunnel syndrome. He enrolled his engineer brother, Mike, to help find the solution. They worked closely with designers at the family's design and machining company in New England to examine how a conventional knife fits in a chef's hand, the movement of a chef's wrist and hand during chopping and the angle at which a knife hits the cutting board. Together, they crafted a knife that was a true extension of a chef's hand.

After just three weeks of using the ergonomically-designed knives, Scott's persistent tendonitis and carpal tunnel symptoms disappeared. He created 50 prototypes of the knives and sent them to professional chefs, student chefs and culinary professors across the country. The response was overwhelmingly positive, and Ergo Chef was born in 2002.
