Bamboozle

Bamboozle was born by finding the perfect medium between eco-friendly demand, manufacturing requirements, and maintaining consumer lifestyles. By following the simple philosophy of sustain, repurpose, last, and degrade, Bamboozle creates a home product perfectly suited for today's consumer.

Sustainable by using excess raw materials of fast growing bamboo. Repurposed by using retooling plastics machines to mold a new responsible material for their products. Bamboozle products are long lasting. You can use every day, machine wash, and enjoy for many years. Bamboozle products are also biodegradable, returning to the earth leaving little trace within 20 years.

Janey lynn's designs Inc.

Janey Lynn's Designs, Inc. was founded by two women entrepreneurs with an idea that has sprouted an award winning kitchen and spa textile line. Each product in our line is unique from its counterparts on the market and a must try for anyone looking for a new spin on the old routine.

THE SHAGGIE®

Many years ago, when most Grandmothers did not throw anything away, Janey's Grandmother made potholders from an old cotton chenille robe and gave them to her as a wedding gift. Years later Janey used one to wipe a spill and the Shaggie® was born! The muli-purpose 100% cotton chenille Shaggie® is tough in action, yet gentle enough for babies. This super absorbent cleaning cloth holds ten times its own weight and even fits a swiffer mop for an eco-friendly solution.

Easy to prepare and use. Just fill with fresh cut fruit and water and place in freezer. Natural fruit infusion takes time, so while freezing, the water-to-ice becomes naturally infused by the fruit. This infusion process is enhanced by the expanding water-to-ice applying gentle pressure on the fruit to release its deep flavour/ Once frozen, the resulting icicle has already been highly pre-infused.

RICH FLAVOUR RIGHT AWAY ...AND ICE COLD

When ready to use, simply drop the icicle into your hydration bottle (needs 2" opening) or tall glass and fill. The icicle immediately starts to release its infused flavour so you will quickly have a delicious natural fruit infused cold beverage.

The icicles fresh fruit flavour will always be preserved while frozen, ready to enjoy at any time.

Set of 2 silicone moulds, one green & one orange. Each mould measures 3" x 2.5" x 8.5". BPA free, dishwasher safe. Colour box.

Fill & freeze several moulds to have ready to enjoy any time (2 sets shown)

Icicles are perfect for tall beverage glasses. Also use 2 or more in pitchers.

Sterilite® Sinkware

Sink Sets offer an inclined drainboard design that allows excess water to flow easily into the sink and include oversized flatware holders. Perimeter cup holders and a unique system of channeled grooves hold dishes in place. The Drainboard and Dish Drainer feature colour-accented rubber feet that prevent skidding and protect easily scratched surfaces. Dishpans are designed to fit standard single or twin sinks and offer durable, heavy-duty construction.

Pitchers

The Twist & Pour Pitcher features an easy-twist lid that contains an open hole and a strainer option for pouring. Sterilite also offers Pitchers with either an innovative pivot-top spout that opens with a touch of a finger or a hinged flip-top spout that stays open and out of the way when pouring. Comfort-grip handles on all pitchers aid in pouring, while graduated measuring marks make it easy to mix drinks inside the pitcher.

BETTER ZESTER

Using the KitchenIQ™ Better Zester is just fun! Never before has zesting been so effortless. The combination of the V-etched teeth and non stick coating allow this Better Zester to skim across the surface of rough citrus while producing thin wisps of flavorful zest without grating into the bitter pith. The frame of this unique Zester is formed with a slight curve allowing a smoother, more steady stroke when zesting. (Or what some call violining! Now just call it better zesting!) KitchenIQ™ has added additional features like the fresh zest storage container with a fantastic squeegee attached for easy zest removal from the blade.

The KitchenIQ™ Better Zester is simply a better way to zest!

- Over 300 V-etched teeth use the shear action of their unique V-shapes to produce even, uniform cuts while using minimal force
- A non-stick coating allows foods to glide across the blade smoothly and makes clean up fast and easy.
- The fresh zest container includes measurements and holds the freshly grated zest, allowing cooks to place the zest directly into their dishes (no need to dirty a measuring spoon).
- The "one of a kind" squeegee slides across the back of the blade removing the flavor rich moist zest from the back side of the blade
- Designed in the USA by Smiths®, The Edge Experts®, a leader in producing sharp edges since 1886
- Patent pending stainless-steel V-etched zester blade for zesting all types of citrus
- Patent pending non-stick food approved coating for smoother zesting and easy clean up
- Fresh zest storage container with measurements
- Squeegee for easy zest removal
- Non slip tip
- Ergonomic soft touch handle
- Reusable cover
- Dishwasher safe

Smoothly and effortlessly zests without grating into the bitter pith.

Includes fresh zest storage container with measurements.

No more dirty fingers! This little device slides across the back of the blade removing the wet zest.

V-shaped teeth easily glide across the surface of the fruit using their shear action.

Card, 6 per case
0027925501672

KitchenIQ specially formulated Honing Solution is non-perroleum based and features built-in stone cleaning agents and rust/corrosion inhibitors. It is excellent for lubricating your Arkansas or diamond stone when sharpening. Never use an Arkansas stone without some kind of lubricant, or you will clog the porse and cause it not to sharpen properly. Diamond stones can be used dry, but we recommend using a lubricant for better performance.

Anchor Hocking is proud to be a leading glass manufacturer in America. We strive to maintain high standards to provide the finest quality products in the marketplace today. Our “Made in the U.S.A.” logo is featured on our packaging to bring awareness to the consumer of the products manufactured in the U.S.

Anchor Hocking has been in the business of manufacturing glassware products for more than 100 years. As befits a company with our heritage, we have continued to produce quality glassware throughout the decades. We manufacture a majority of our products in Lancaster, Ohio. We are as emphatic about the quality of our products today—proud of the design and of the value they represent for consumers and the fact that you will find them in the kitchens, bathrooms and living rooms of most every home. But there is one way in which we have changed in recent years, and that is the corporate-wide commitment we have made to become a more environmentally friendly company. It is an intitiative we view as being vital to our future, and we’re taking many positive steps to make it happen.

Anchor’s Glass is 100% recyclable once a product has met its life’s end. This helps reduce trash in landfills, cuts down on pollution and saves raw materials. Anchor reclaims all of our waste glass known as cullet. We then reuse the cullet in our furnaces to help create new glass. That means using fewer raw materials, saving energy, cutting down landfill waste and less pollution. Anchor has instituted a Corporate Responsibility for Sustainability program that identifies opportunities for waste reduction including raw materials, energy and pollutants on an ongoing basis. We design our packaging to reduce environmental footprints. Anchor utilizes recycled and recyclable materials as often as possible along with reducing the overall packaging material requirements and size. This reduces the need for new raw materials and allows us to ship more products using less transportation and fuel. Anchor’s glassware does not contain lead or any other materials that are harmful to your health. In addition, plastic lids used on Anchor food products are BPA free.

Island Bamboo™

Island Bamboo™ products are an earth friendly choice for kitchenware products because they are high quality with a long useful life, manufactured from bamboo, a renewable resource and thoughtfully packaged to reduce waste.

The Island Bamboo™ brand is manufactured exclusively from Moso bamboo, which is not a food source for China's endangered Giant Panda, while the HUE Bamboo line extension incorporates innovative material accents including non-toxic silicone, food safe lacquer and rainbow wood made from white birch.

Bamboo is a renewable resource and viable alternative to wood and petroleum based products. It is a plant that grows abundantly, as much as 2 feet per day, with little water while providing 35% more oxygen than similar standings of timber.

Made in France since 1965. SILPAT® products are a must-have for all bakers. SILPAT® is the original non-stick baking mat.

Since 1965, Demarle has been committed to improving your baking experience by introducing top quality products. SILPAT® products never need greasing and replace parchment paper. Using SILPAT® products saves time, money and reduces waste in our environment.

SILPAT® products are great for working with sticky materials such as gooey batter, taffy, caramel, doughs and anything your imagination allows. Nothing sticks to SILPAT®.

SILPAT® Non-Stick Baking Mats are made of fiberglass and food grade silicone. SILPAT® products are completely food safe. Our products are FDA, NSF and Kosher certified.

The Original FRESH & CREAMY Butter Bell®

Our unique design keeps butter at the perfect “spreading” consistency by reflecting outside heat while insulating and cooling the butter. Flavour and freshness is protected by an airtight seal of water at the base of the crock.

Proper maintenance: water should be changed out every three days. Replace existing water in the base with fresh, cold water. The crock should be stored away from heat or sunlight.

Holds up to one full stick (1/2 cup) of butter. Softened butter is packed firmly into the bell-shaped lid. Cold water is poured into the base of the crock. The lid is placed upside down back into the base of the crock. Soft, spreadable butter may be enjoyed and served right from the crock.

Classic Crocks

The Original Butter Bell® Crock is a modern version of the Authentic French Beurrier. Each piece is individually hand painted for a one of a kind uniqueness. Two styles have the French word for butter “Beurre” on one side and the English word “Butter” on the other. Made of high quality New Bone China crocks are dishwasher safe and lead free.

BAR KEEPERS FRIEND®
SINCE 1882

In 1882, an Indianapolis chemist noticed how clean and shiny his tarnished pot was after cooking rhubarb. Using an active ingredient that's found in the plant he formulated a talcum-smooth cleanser and sold it to the city's taverns. So pleased were his customers with how well it worked on bar fixtures, the product was dubbed the "Bar Keepers Friend."

The same non-bleach formula that put a shine to the brass rails of taverns at the turn of the century is used in households today on stainless steel, porcelain and ceramic surfaces among many others.

Today, Bar Keepers Friend is still made in Indianapolis and contains no phosphates.

ERGO CHEF®

My Knife Is Smarter Than Yours®

Like most unique companies, Ergo Chef was founded serendipitously. Scott Staib wasn't supposed to make knives; he was supposed to be a chef. After his training at Johnson & Wales University, Scott set out to rise through the culinary ranks. His first stop was an ultra-swanky country club where he proved his mettle as the sauté and grill chef. Next was his gig as sous chef for Aramark Food Service Corporation. He was on the fast track in foodservice when he was sidelined by tendonitis and carpal tunnel syndrome - a result of the repetitive motion injuries caused by frequent chopping and slicing. Without a fully-functioning wrist, Staib could not cook his dinner, let alone advance his career.

He was not alone. Scott found that he was not the only chef—professional or home—to suffer from tendonitis and carpal tunnel syndrome. He enrolled his engineer brother, Mike, to help find the solution. They worked closely with designers at the family's design and machining company in New England to examine how a conventional knife fits in a chef's hand, the movement of a chef's wrist and hand during chopping and the angle at which a knife hits the cutting board. Together, they crafted a knife that was a true extension of a chef's hand.

After just three weeks of using the ergonomically-designed knives, Scott's persistent tendonitis and carpal tunnel symptoms disappeared. He created 50 prototypes of the knives and sent them to professional chefs, student chefs and culinary professors across the country. The response was overwhelmingly positive, and Ergo Chef was born in 2002.

Each Römertopf® is handcrafted in Germany using the natural clay resources found in Germany for the finest quality in the world.

The glazed bottom is made of a glass frit material and is not made of non-stick chemicals. This allows the user to be able to clean the pot easily, and cook a wide range of food items such as meats, casseroles, desserts, and even bread.

The unglazed top is to be soaked before use. The lid will absorb the right amount of water every time for your cooking project and creates a blanket of steam inside and out during the cooking process.

Römertopf® is made with top of the line materials. Rest assured, our products are free from lead, cadmium, colour dyes, plasticizers, or petalite. All natual and European tested.
